MAKSIM SOKOLOV

Minister of Transport
of the Russian Federation

The scope of questions and proposals elaborated at the annual platform of the Forum helped generate a list of topical problems, characteristics and prospects of application of intelligent transport systems, and facilitated discussion of the industry's potential.

Presently information technologies are rapidly developing, their successful development reinforcing the growth of transport industry and the state in general. It's the interaction between all types of transport, cooperation of business representatives, public authorities and communities that will enable faster and better implementation of intelligent systems' improvement and mass use objectives.

The annual 'Intelligent Transport Systems of Russia' International Forum is a necessary tool for the Transport Industry to develop a relevant agenda and fruitful cooperation.

Key topics of the Forum

Transport infrastructure in the digital economics system. Digital Age Transportation

ITS to Regions: new solutions and regional experience of intelligent systems' implementation

Mobility as a Service (MaaS). Services for passengers

Topical questions of motorways maintenance systems and weight & dimension monitoring integrated development

Smart logistics: information systems, electronic turnover and inter - industry cooperation in logistic processes

Conference «ITS to Regions»

Continued discussion of regional level solutions and proposals developed by the Forum in the field of intelligent transport systems' development, taking into account the social and economic potential of the regions. The event takes place annually in Russian cities in form of a conference.

Oryol – 22-24 March 2017

Irkutsk – 2018

Business Breakfast «Mobility as a Service (MaaS)»

Mobility as a Service, MaaS is a new development area for the transport system. Growing competition in transport markets urges operators to rethink their ticketing and payment processes and implement new technologies.

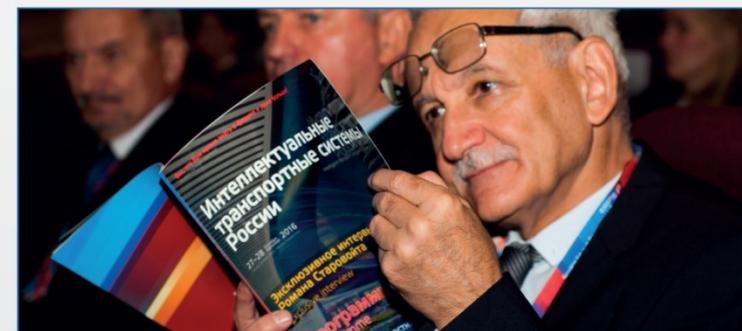

Participants of the event are the Ministry of Transport of the Russian Federation, Ministry of Communications and Media of the Russian Federation, Federal Road Agency (ROSAVTODOR), Committee on transport and construction of the State Duma of the Russian Federation, State Company Avtodor, Department of transport and development of transport infrastructure of Moscow, Committee for transport of the Government of St. Petersburg, Analytic Center under the auspices of the Government of the Russian Federation, airports of Moscow air hub, Russian Railways OJSC, Central PPK OJSC, GLONASS GSC, Rostelecom PJSC, as well as representatives of business, science and non-governmental organizations such as Delimobil, Aeroexpress, Higher School of Economics, MADI, MIIT, IT companies and IT integrators.

The event is arranged as a business lunch with participation of HSE Institute of transport and transport policy.

Quarterly Journal «ITS Russia»

«Intelligent Transport Systems of Russia» periodical is a key printed media on ITS, which includes: current news, interviews with ITS market key players, opinions of experts on burning topics, analytical essays etc.
